

not enforce the terms of the Gore-McCain Act on the grounds that the missiles are not "destabilizing."

I am not quite sure what the word "destabilizing" means in this kind of a circumstance, but that is where the administration has chosen to come down.

I believe that a nondestabilizing missile can be just as deadly to a ship as a destabilizing missile. Once a missile is fired, it knows no semantic definition, as it goes on its course for a kill. Ask the sailors on the *Stark* whether the presence of the Exocet missiles were destabilizing in the circumstance in the Middle East or not. Thirty-seven of them are dead.

Given our obligation to those that we would place in harm's way in the name of this country, I believe the time has come to put this issue on the front burner. I have asked the administration about it. I have used the congressional oversight circumstance to bring it to their attention. Now, Mr. President, today, I submit a resolution outlining the sense of the Senate that the administration either enforce the Gore-McCain Act in this circumstance or take some other appropriate action.

Mr. President, I ask unanimous consent that the letter which I sent to Madeleine Albright on the 17th of April and a fact sheet relating to the C-802 missile be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, April 17, 1997.

Hon. MADELEINE K. ALBRIGHT,
Secretary of State,
Washington, DC.

DEAR SECRETARY ALBRIGHT: During 1996 Chinese defense companies delivered a number of missile boats to the Iranian Revolutionary Guard Navy. Each missile boat was armed with four C-802 cruise missiles. Recently, Deputy Assistant Secretary of State Robert Einhorn told the Senate, "These cruise missiles pose new, direct threats to deployed U.S. forces."

It is now my understanding that China is about to deliver the land variant of the C-802 to Iran. When the Iranian Revolutionary Guard acquires C-802s in quantity, it will have a weapon with greater range, reliability, accuracy, and mobility than anything currently in its inventory.

The delivery of advanced cruise missiles to Iran is a violation of the Gore-McCain Act. However, in answer to my query on this issue in January, you answered, "The Administration has concluded at present that the known transfers (of C-802s) are not of a destabilizing number and type."

However, I believe that the arrival of additional C-802s in Iran is a matter of grave concern to the United States, and the Administration has an obligation either to sanction the perpetrators or put in motion an alternative policy of equivalent strength.

Sincerely,

ROBERT F. BENNETT,
U.S. Senator.

C-802 FACT SHEET

U.S.S. *Stark*: American Navy escort vessel struck by two Exocet type cruise missiles in May 1987 killing 37 sailors and disabling the ship for sixteen months.

C-802: Chinese cruise missile similar to the Exocet and marketed for use against naval

escort vessels. According to its manufacturer, the China National Precision Instrument Import-Export Corporation, the C-802 is characterized by "mighty attack capability, great firepower." It has a range of 120 km [75 miles] and a high explosive warhead of 165 kg [363 lbs.].

Iranian Revolutionary Guard Navy: Iran is believed to possess sixty C-802 missiles aboard 15 Chinese and French missile boats.

Land-based Variant: Iran is believed to be acquiring an undetermined number of C-802 missiles which will be mounted on Transporter-Erector-Launchers [TELs]. For over a year Iran has been constructing tunnels and other fortifications along its Persian Gulf and Gulf of Oman coastlines which could accommodate these TELs.

Threat to U.S. forces: 15,000 U.S. servicemen and women are potentially within range of these missiles. On April 11, Deputy Assistant Secretary of State Robert Einhorn told the Senate Governmental Affairs Committee, "These cruise missiles pose new and direct threats to deployed U.S. Forces." During 1996 Admiral Scott Redd, Commander-in-Chief of the U.S. Fifth Fleet declared the missiles to be a "360 degree threat which can come at you from basically anywhere at sea in the gulf or out in the Gulf of Oman."

U.S. Law: The Iran-Iraq Arms Non-Proliferation Act of 1992 (50 U.S.C. 1701 note) prohibits foreign persons from delivering advanced conventional weapons, including cruise missiles, to Iran.

Administration Position: The Administration "has concluded at present that the known types [of C-802 missiles] are not of a destabilizing number and type."
